Communications & Marketing

ARE strives to enable the private sector to:

- Deliver sustainable electricity services to more than 500 million additional people
- Catalyse the creation of more than 5 million green jobs
- Avoid more than 1 billion tonnes of CO₂e emissions

What our Members say

ARE has a great network. They introduced us to lots of developers and regulators in multiple markets that we needed to work with. They published our case studies which made a lot of people to reach us and give feedback. Ultimately, this has let us scale up and legitimise our technology.

Afnan Hannan
CEO
Okra

It is very important for us to collaborate with different stakeholders. That's why we decided to work with ARE. For example, we found EAIF very interesting for us. Not only did we manage to generate new business opportunities and connections, but also, we improved our brand awareness through ARE's communications & marketing support during the event.
