Accessing the venue

Travel to Kenya

Visa:

Kenyan authorities introduced an Electronic Travel Authorisation ([eTA](#)) system for all foreign visitors.

Travellers must apply for an eTA online before departure via the official government portal.

The process typically requires:

- A valid passport (minimum six months before expiry),
- A recent passport-size photograph,
- Travel details, including flight and accommodation information,
- A credit or debit card for the processing fee.

All African nationals, with the exception of citizens of Libya and Somalia, are exempt from visa requirements.

Health & Safety:

Nairobi is a welcoming and vibrant destination, and both Nairobi and the Safari Park Hotel are considered safe for visitors.

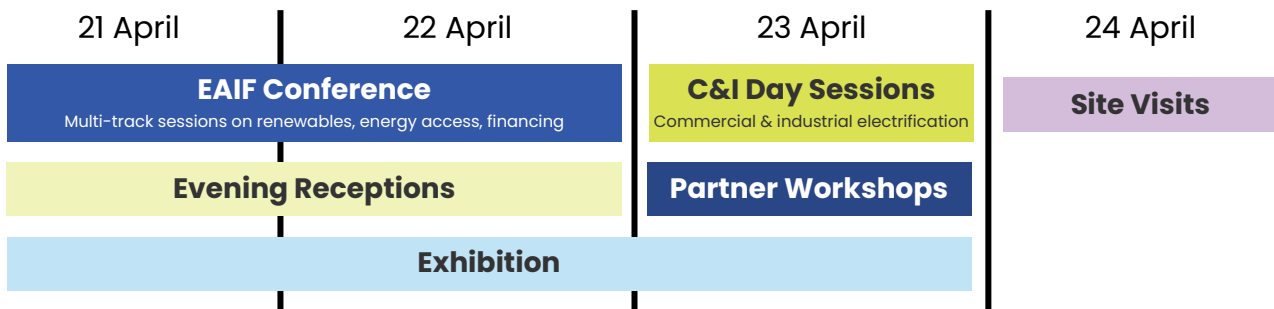

However, as in any major city, it is important to exercise normal caution.

We recommend using licensed taxis or hotel-arranged transport for all local travel. Avoid walking alone late at night and keep valuables discreet.

A yellow fever vaccination certificate is required for entry if you are arriving from, or have transited through, a country where yellow fever is present.

For hotel recommendations, visit the [Venue & Travel](#) page.

Event Programme

In addition, lunch catering, coffee breaks, and networking access are included with all tickets.
